Mr. Preston Bown
Utah Building Stone Supply
842 West 400 North
West Bountiful, UT 84087

Dear Mr. Bown:

On March 1, 2001 a meeting was held in the Bureau of Land Management's (BLM) Salt Lake Field Office to discuss BLM's new Surface Management Regulations which became effective on January 20, 2001. At that meeting, you told Salt Lake Field Office geologist Michael Ford that you would repair and remove the inoperable Caterpillar bulldozer that is located in the SE¼ of Section 3, T. 12 N., R. 17 W. during the year 2001. We are hereby confirming that conversation.

Please be advised that during the on-site repair of your bulldozer, you are not authorized to discharge any oil, fuel or other petroleum products or deleterious materials onto the ground. All areas where the soil that has been discolored or affected by a spill or discharge of petroleum products or other deleterious materials must be excavated and removed to an appropriate disposal site, not dumped on Public Lands. Any excavations created during soil removal must be backfilled and revegetated with an appropriate native seed mixture. Please contact this office for a list of recommended seed to use for reclamation.

In a separate but related issue, your submitted Plan of Operations will not be authorized by this office until the subject bulldozer has been repaired and removed from Public Lands. Before removing the bulldozer from Public Lands, you are hereby authorized to use this repaired equipment to continue reclamation of the numerous access roads in the Grouse Creek Mountain area, as you agreed to do with the Utah Division of Oil, Gas and Mining (UDOGM) and the BLM. The final acreage for your Plan of Operations is dependent upon reclamation of the areas shown on UDOGM's map entitled "Exhibit A", dated December 9, 1997.

Thank you for your cooperation. If you have any questions, please feel free to contact Michael Ford of my staff at (801) 977-4360.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael G. Nelson". The script is cursive and fluid.

Michael G. Nelson
